

Atomic Energy Equilibrium

Force Factor (548) (**Particle Mass**) ~ moving through a **Electrostatic Field** (544) having a **Negative Electrical Charge** (546) and exhibiting a **Electromagnetic Field** (547) opposing **Orbital Velocity** (549) of moving electron (s) (la xxx ln) is/are being continually compensated for and overcome when a discrete amount of **Universal Energy** (9) enters into and interacts with the **Energy Spectrum** of the atom by way of energy aperture (7)

... allowing and maintaining **Stable Energy -State** of the atom even if other energy stimuli are not available beyond the physical embodiment of the atom...such as the absent of sunlight (**Photon**) absorption. See *Appendix (B) Note (3)*.

Appendix B

“Note 3): **Universal Energy** (9) of Figure (5-10) being a continuous energy potential (source) (C2) coming into our space continuum and creating and sustaining/maintaining our expanding universe, as so extrapolated via mass equation $E=MC^2$.

Whereby, **Universal Energy** (C2) having native intelligence to create mass (M) (to cause electromagnetic wave-vectoring - photon structuring _ electron to proton grouping to form atoms - molecular arrangements to bring-on chemical processes to sustain life) which, in turns, emits **radiant energy** (E) under different stimuli conditions ...

example, particle oscillation as a energy generator by way of "**Electrical Stress**".
