

# Energy Recycling Spectrum

Once expelled into **Earth Atmosphere** (541), the energy spent (partly de-energized water molecule atoms) water mist (531) is re-exposed to **Sun Energy** (534) to allow and cause **Photon Energy Absorption Process** (532) of Figure (5-7) that, now, re-vitalizes and returns de-energized **Water Molecule Atoms** (531a xxx 531n) to **Stable Energy State** (538) when spent water mist (531) undergo **Water Evaporation Process** (531) to form **Moisture Cloud Formations** (533) which, when and after formed, are continually exposed to incoming **Sun Rays** (539a xxx 539n) until **Rain Droplets** (535) return newly re-energized water molecules (538a xxx 538n) to **Earth Water Supply** (536) ... completing **Open Ended Energy Recycling Spectrum** (530) for **Energy Re-use**, as further illustrated in (530) of Figure (5-6).

**Photon Energy Absorption Process** (531) of Figure (5-7) , of course, can occur in an instant of time.
