

WFC Exhaust Air Reclaimer

To eliminate the possibility of expelling out any **Nitric Oxide** NO gas which is generally produced when an electrical spade occurs inside an internal combustion (IC) engine or any other chemical-oxide that may be present in the exhaust-air, **WFC Exhaust Air Reclaimer** (900) of Figure (9-1) can be utilized to comply with **U.S. Environmental Protection Agency** (EPA) clean Air Act similar in construction to **Voltage Intensifier Circuit** (110) of Figure (4-9), **WFC Exhaust Air Reclaimer** (900) of Figure (9-1) utilizes opposite electrical attraction force (RR' - SS') of voltage potential (Va xxx Vn) to separate the atoms of the **Nitric Oxide** NO molecule (typically < 1ppm when running on water) by overcoming **Electrovalent Attraction Force** (q - q') that exist between the polar-charged **Nitrogen** (B+) and **oxygen** (B-) atoms.

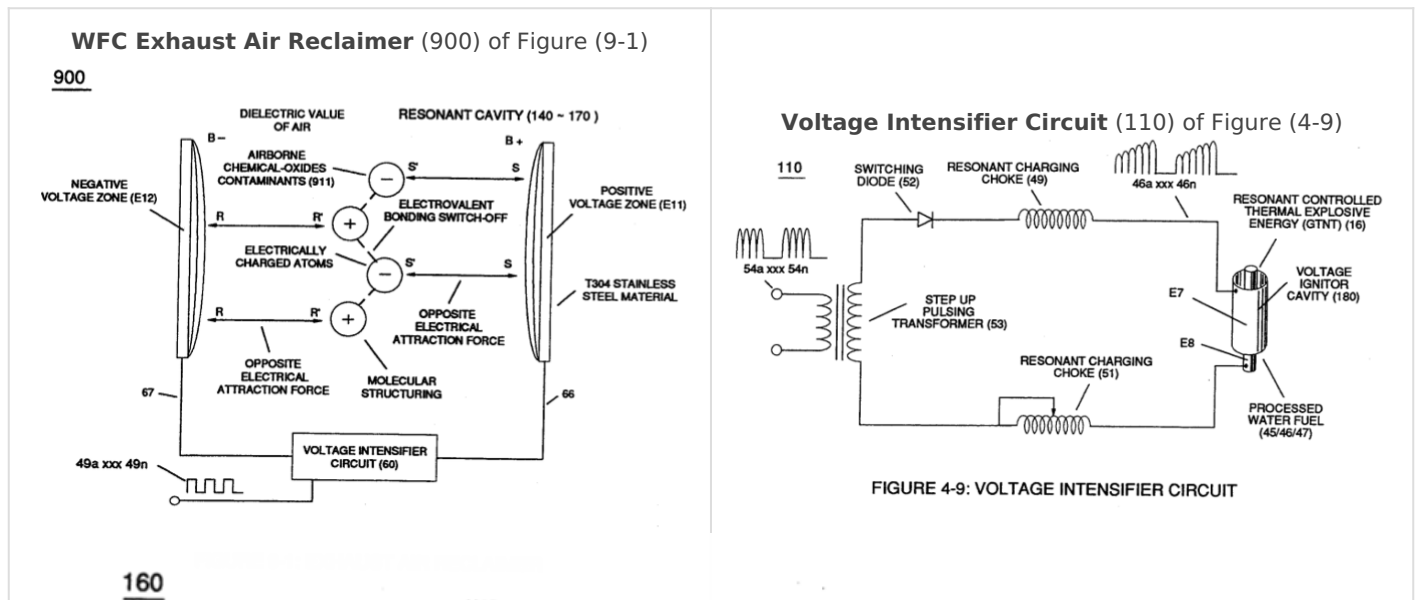

FIGURE 3-26: ELECTRICAL POLARIZATION PROCESS

This is accomplished since the

Voltage Intensifier Circuit (110) of Figure (4-9) is pulsed sensitive (49a xxx 49n) to tune-in to the dielectric properties of the airborne gas-molecule to not only activate **Covalent Switch-Off**

phenomenon (550) of Figure (5-8) by restricting amp influxing to cause "**Electrical Stress**" across **capacitor gap** (Cp) (690) of Figure (7-6) but, also, **elongates** the electrically polarized **Nitric Oxide** NO molecule to change the time share-rate of covalent electron (s)

.•• performing the same function as **Electrical Polarization Process** (160) of Figure (3-26) by which the positive electrical voltage potential (71) attracts the negative charged oxygen atom; while, simultaneously, negative electrical voltage potential (61) attracts the positive charged **Nitrogen Atom**

... pulling apart and separating the atoms of the **Nitric Oxide** NO molecule by way of **Voltage Dynamics** (220) of Figure (3-29) under the law of physics which states "**opposite electrical charges attracts**", as so illustrated in (900) of Figure (9-1).

FIGURE 9-1: EXHAUST AIR RECLAIMER

Likewise, other chemical-oxide gas molecule (s) such as **Nitrogen Dioxide** NO₂ (940) of Figure (9-5) exposed to **Electrical Polarization Process** (160) utilizing **Gas Resonant Cavity** (140) undergoes the same molecule-to-atom separation

FIGURE 9-5: NITROGEN DIOXIDE NO₂

... thereby, reversing the degradation effect of burning fossil-fuels

- .. liberating oxygen O₂ molecule once again for reuse under "**Earth Ecological Life Support System**"

... collecting atoms under static charged for Industrial reuse

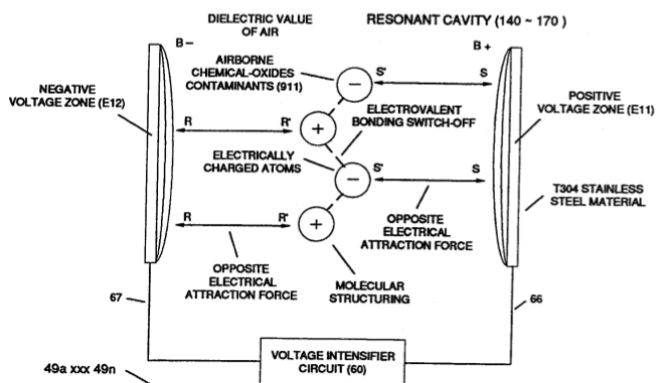

- .. resulting in revitalized clean air once again to sustain all life-forms on Earth.

Of course, water mist derived from hydrogen combustion is removed prior to engine exhaust air-gases entering into and passing through **WFC Exhaust Air Reclaimer System** (900).

Air purification by **atomic deflection** (900) of Figure (9-1) is possible since airborne atoms are neither destroyed nor created during exposure to "**Voltage**" **pulse-stimulation** (E11/E12 ... 49a xxx 49n) propagating "**Electrical Stress**" pulse-waves (Mm'- ASS') which, in turn, induces "**Electrovalent Switch-off**" phenomenon (550) of Figure (5-8).

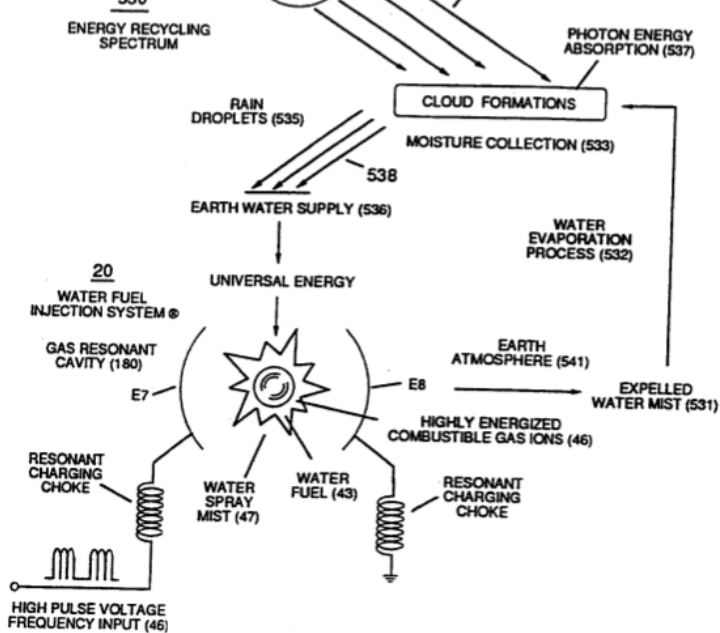

FIGURE 5-6: OPEN ENDED ENERGY SYSTEM

Energy enhancement of these liberated

airborne atoms during the process of molecular-separation (900) comes either from **Photon Absorption Process** (537) of Figure (5-6), or from **Energy Pumping Action** (520) of Figure (5-3), or combination of both **Energy Sources**

... Sun Energy (534) in retrospect to **Universal Energy Pathway 2** of Figure ~, as so illustrated in **"Energy Recycling Spectrum** (530) of Figure (5-6).

In alternate form, solid state electrical photon-light source (**Light Emitting Diodes**) (1100 xxx 116n) of Figure (3-33) replaces **Sun Rays** (539) of Figure (5-6) when "**Voltage Tickling of State Space**" (770 of Figure (8-1) acts as a "energy generator" by way of "particle oscillation" ~ of Figure ~ as to (~ .of Figure ~ to cause/activate **Atomic Energy Level Adjustment** (540) of Figure (5-7), as illustrated in **Gas Processor Process** (260) of Figure (3-33) as to Figure (1-17).

260

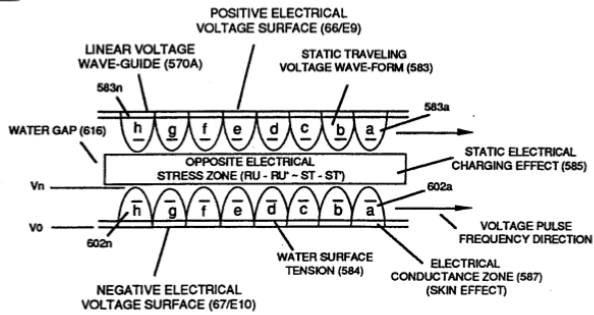

The diagram, titled "530 ENERGY RECYCLING SPECTRUM", illustrates a process for generating water fuel from solar energy. At the top, a circle labeled "SUN ENERGY (534)" emits "SUN RAYS (539a xxx 539n)". These rays are absorbed by "CLOUD FORMATIONS" via "PHOTON ENERGY ABSORPTION (537)". This process leads to "MOISTURE COLLECTION (533)" and "WATER EVAPORATION PROCESS (532)". The "EARTH WATER SUPPLY (536)" is shown as a source of "RAIN DROPLETS (535)", which are collected into "CLOUD FORMATIONS". The "EARTH WATER SUPPLY (536)" also provides "EARTH WATER (541)" to the "ATMOSPHERE". The "ATMOSPHERE" produces "EXPULSED WATER MIST (531)". The "ATMOSPHERE" also contains "HIGHLY ENERGIZED COMBUSTIBLE GAS IONS (46)". A "UNIVERSAL ENERGY" source is shown as a star-like symbol, connected to a "GAS RESONANT CAVITY (180)". The "GAS RESONANT CAVITY (180)" is connected to a "WATER FUEL INJECTION SYSTEM" and a "WATER SPRAY MIST (47)". The "WATER FUEL INJECTION SYSTEM" is connected to a "RESONANT CHARGING CHOKE" and a "HIGH PULSE VOLTAGE FREQUENCY INPUT (46)". The "WATER SPRAY MIST (47)" is connected to a "RESONANT CHARGING CHOKE" and a "WATER FUEL (43)". The "WATER FUEL (43)" is connected to a "RESONANT CHARGING CHOKE" and a "HIGH PULSE VOLTAGE FREQUENCY INPUT (46)". The "WATER FUEL (43)" is also connected to a "RESONANT CHARGING CHOKE" and a "HIGH PULSE VOLTAGE FREQUENCY INPUT (46)".
